Dear Mr. Dević,

I would like to thank you for your email of March 29 addressed to President Trump. I read your account of the issues you have experienced with your investment in ATP "Vojvodina" a.d. and the new bus station in Novi Sad with great interest.

I appreciate the time you took to inform me about the case. I can tell you we are certainly aware of your case, as well as other troubled privatization cases in Serbia.

We follow developments in cases such as yours with great interest, because we are aware of the negative impact such cases can have on the investment climate in Serbia. Serbia needs jobs and investment, and a secure legal environment is one of the most important prerequisites for investors to have sufficient confidence to launch new operations here.

We wish you well in your efforts with Serbian institutions to bring this case to an equitable conclusion.

Sincerely,
